Round 3C **Question lenses**

PLUGINS-KIT:TASK-KIT-EXTRACTION

Task kit extraction

P1 active 2 decisions

Orient reads, Decide requests input, and Trace exposes exact evidence.

Orient 5 answers | **Decide** 2 answers | **Trace** 4 facts

Answering service **On** - Spend usage **Off**

Dashboard settings / Answers

Concept: Lenses separate kinds of attention. Answerer tier and freshness stay attached to every item; Trace gives script facts their own natural home.

Orient

Enough context to resume, with exact state beside model interpretation.

WHAT IS THIS TASK FOR?

Make active task work easy to understand and resume.

The dashboard now needs a trustworthy detail view before more automation is added.

local qwen as of task record 10:42 **current**

WHERE DOES IT STAND?

Session tracking is ready; detail-view design is at round 2.

The detail-view part is outdated because the task record changed after this answer.

local qwen answer as of 09:55 inputs now 10:42 **stale**

WHAT SHOULD HAPPEN NEXT ACROSS BOTH WORK STREAMS?

Waiting: spend usage is off

Local Qwen declined. Luna is the next capable answerer and has not run.

luna - paid **not run**

EXACT STATE

18m last activity age	**3** open items
2 need you	**no** stale signal

script - exact task record + sessions, read 10:47

WHAT IS WAITING ON ME?

Choose the task-detail direction and accept or reopen the older form behavior.

local qwen as of task record 10:42 **current**

Orient Resume from exact state plus interpretation.

Decide Show only choices that need a person.

Trace Lead with scripted commits and state history.
